

precision machined components

Capacity installed in UK, USA and India

Over 25 CNC machining centres

- Multi pallet (vertical / horizontal) capability
- 800 X 800 X 600mm capacity
- Spindle probing and hydraulic clamping
- Proprietary holding fixtures (single or multiple components)

Dedicated production cells installed, based on application requirements

Full Tier 1 supply solutions

Management of specialist outsourced operations, e.g. coatings and surface treatments

Typical components

- Turbo blades/nozzle rings
- Compressor milled wheels
- Actuator rods
- Precision forging dies
- Electrodes for precision forging dies

Typical applications

- Turbochargers
- Engines
- Pumps
- Precision forging dies
- Automotive ancillary systems
